

High Performance Encapsulated Powders

Flavours are often exposed to reactions, oxidation, evaporation, extreme pH, heat and light conditions throughout the manufacturing, storage and distribution process. This often results in the loss of flavour profile in the final product. Encapsulation of flavours protects the volatile and delicate molecules present in flavouring compounds.

EnKap is Encapsulated Powder Flavours from Keva. Our encapsulated powder flavours are uniquely designed for specialized applications such as Powder Soft Drinks, Health Food Drinks, Pharmaceuticals, Nutraceuticals & Dry Premixes.

Enhanced Performance Maximising Delivery

Enhanced Taste Perception

Improved flavour perception for more freshness and authentic taste profile.

Controlled Release

Delayed release and sudden burst of flavours at just the right moment for maximum satisfaction.

Customizable Particles*

Customizable particle size and colours as per requirements for specific applications.

Protected Flavour Compounds

Protection of flavour compounds during manufacturing, storage, distribution, and against interaction with food ingredients.

Smart Technology for Best-in-class Result

Instantly Soluble In Water

Water soluble particles perfect for flavour release in mouth and for majority of beverage applications.

Improved Thermodynamic Stability

Better thermodynamic protection reducing the need for the introduction of higher dosages of flavours.

Increased Flavour Shelf Life

Improved storage stability against oxidation and loss of intensity ensures longer flavour shelf life of your products.

Cost-in-use Benefit

Greater cost-in-use benefit and shorter lead-time ensures your cost is always under control.

Top features at a glance

Spray drying technology

Particle size ranges from 70 to 300 microns

Instantly soluble in water

Low hygroscopic powders

Stability up to 18 months

Natural colouring possible*

Halal and Kosher certifiable

PSD, HFD, Dry Premixes & Pharmaceuticals

EnKap is an encapsulated flavour compound with greater shelf life. Encapsulation ensures flavour molecule is protected by the encapsulation matrix thereby ensuring greater flavour stability and controlled release.

EnKap is best suitable for products such as Powder Soft Drinks, Health Food Drinks and Dry Premixes. It is also used for pharmaceutical products such as Dry Syrups, ORS Powders, Chewable Tablets, Effervescent Tablets and Nutraceutical Products.

*Customization is subject to minimum order quantity.
