Wilmar International Profile

Wilmar International Limited, founded in 1991 and head quartered in Singapore, is today Asia's leading agribusiness group. Wilmar is ranked amongst the largest listed companies by market capitalization on the Singapore Exchange.

Wilmar's business activities include oil palm cultivation, oilseeds crushing, edible oils refining, sugar milling and refining, specialty fats, oleochemicals, biodiesel and fertilizers manufacturing and grains processing. At the core of Wilmar's strategy is a resilient integrated agribusiness model that encompasses the entire value chain of the agricultural commodity processing business, from origination and processing to branding, merchandising and distribution of a wide range of agricultural products. It has over 850 manufacturing plants and an extensive distribution network covering China, India, Indonesia and some 50 other countries. The Group is backed by a multinational workforce of more than 93,000 people.

Wilmar's portfolio of high quality processed agricultural products is the preferred choice of the food manufacturing industry, as well as the industrial and consumer food catering businesses. Its consumer-packed products occupy a leading share in its targeted markets. Through scale, integration and the logistical advantages of its business model, Wilmar is able to extract margins at every step of the value chain, thereby reaping operational synergies and cost efficiencies.

Wilmar remains a firm advocate of sustainable growth and is committed to its role as a responsible corporate citizen.

Liaoning Yihai Kerry Profile

Liaoning Yihai Kerry Starch Technology Co., Ltd is created by Yihai Kerry Group, a subsidiary corporation of Wilmars International, established in 2006 with total Investment 1.5 billion, this new plant occupied 640000 square meters area and employed 450 workers with location in No.19, North Ring Road, Kaiyuan, Liaoning. With corn deep processing technology, our main business is production and capital operation. We have built 40000 tons silo group and 100000 square meters corn storage yard. In order to support transportation, we built 7 railways with 5 KM length which can transfer 2000 tons materials&products everyday and cover 40000 square meter product warehouse. What's more, we introduced 2 sets 130t/h CFFB (circulating fluidized bed boiler and 2 sets 12 megawatt back pressure type generator.

By investing 1 billion RMB, we introduced world-leading corn processing equipment for corn starch project, now we can process 660000 tons corn which support capacity of corn starch 460000 tons, fibrous feed 100000 tons, corn germ meal 460K tons, corn protein feed 35K tons and corn syrup 18K tons, through this project we can realize total industry output 3 billion RMB and tax declaration 200 million RMB. Beside corn starch, we invest another 500 million for corn starch sugar project which adopt membrane filtration and horizontal batch type crystallization technology. With world advanced technology, capacity of dextrose monohydrate can reach to 100K tons, maltose syrup 100K tons and HFCS 300K tons. Our target is to keep expending corn deep processing industry chain and step to high adds-on and high-tech market.

Under human-oriented guidance, we provide our customers with excellent product and service by keep improving management. Delivering value to our customers is our main purpose.

Product Introduction

Corn Starch

Corn Starch is powder made through dipping, breaking, separating, refining and drying from corn, the color is pure white, it is widely used in food, phama, textile, starch deep processing and so on.

Dextrose Monohydrate

Dextrose Monohydrate A kind of white crystal powder which use corn starch as raw material. It is edible and can be used in confections, cakes, beverages, biscuits, bakery foods, medicinal drugs, jam jelly and honey products for better taste, quality and with low cost feature than cane sugar.

High Fructose Corn Syrup

High Fructose Corn Syrup is a processed corn syrup widely used as sweetener in food and beverage. As a sweetener, High Fructose Corn Syrup can be used in a wide variety of industries including: food production, beverage, and various other industries. With different percentage of fructose in dry basis, we can divide HFCS into F42 and F55. It has such function as better taste & flavor, lower price, cool texture, high solubility, anti-crystallization and so on.

Maltose Syrup

Maltose Syrup is a processed corn syrup widely used as sweetener in food and beverage. As a sweetener, maltose syrup can be used in industries including: confectionery, beer, beverage, dairy, bakery and various other industries. It has such function as mild sweet, low moisture absorption, high moisture retention, anti-crystallization, good stability, mild thickness and so on.

Corn Gluten Meal

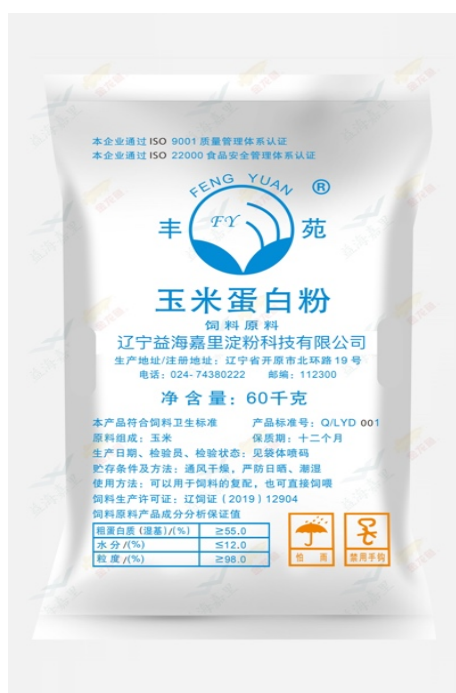

Corn gluten meal is a refinery by product from corn starch or brewing industry processing, it contains full nutritional protein and have special flavor and color, can be used for feed. Corn gluten meal has more raw material supply than other feed like fish feed and bean pulp. With high feed value, no hazard ingredient, no reprocessing, corn gluten meal can be used in protein feed directly.

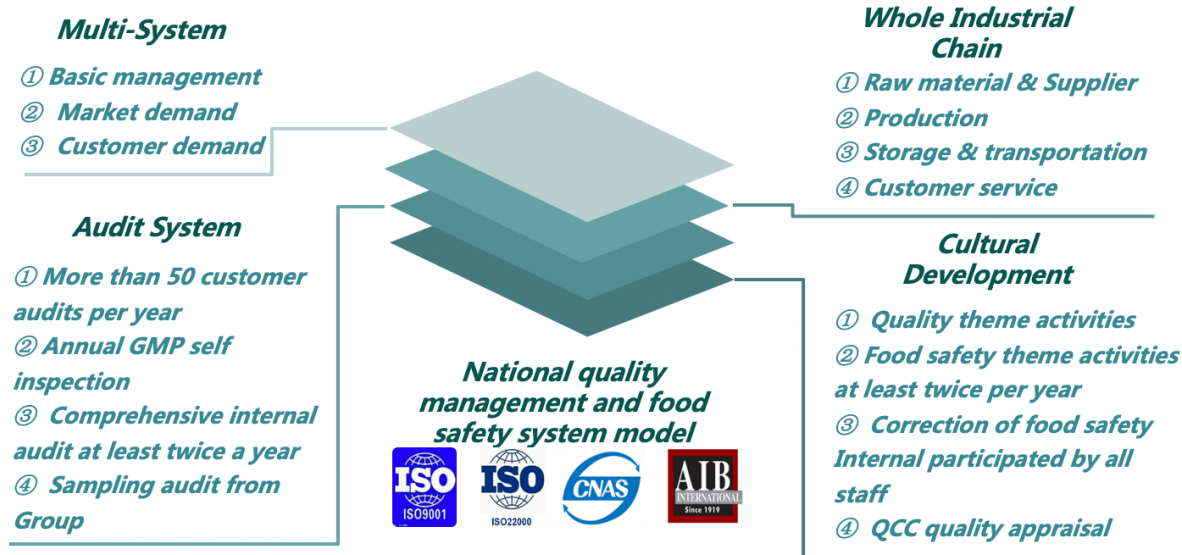

Corn Gluten Feed

Corn gluten feed is also called corn gluten or corn protein feed, it is a byproduct of corn starch and corn germ after dipping. By spraying the dipping liquid which contain protein and high energy on gluten, the feed protein, energy and amino acid will increase a lot. It has advantage than other vegetable protein materials:

1. Good appearance with natural color
2. High energy, fast digestion, low consumption and help animal to grow fast.
3. Strong flavor and good tasting, it can be used for different kinds of feed (protein and energy supply)

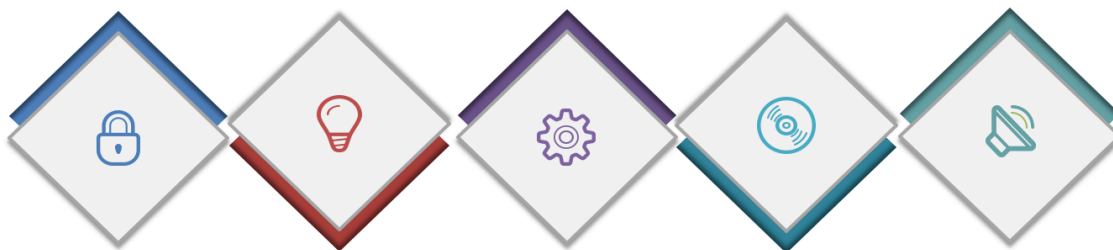

QA System - Multilevel

Raw materials
 Whole-process control for
 Corn, Ingredients

Laboratory
 CNAS 17024 qualified
 Laboratory

Traceable QA System
 From Raw Materials to
 finished products

World Top Class R & D Team
 Wilmar International R&D
 Center, Advanced
 Technology from U.S.A &
 Europe

Advanced Equipment
 Gas Chromatography,
 Refractometer,
 Osmometer, etc.
