Functional Beverages

Have you considered enhancing your functional beverages with essential minerals? Pure Health & Earth's magnesium chloride presents a compelling option due to its numerous benefits. Highly soluble and easily incorporated into sports drinks, electrolyte drinks and various other functional drinks, magnesium chloride serves as a crucial electrolyte, particularly during periods of significant fluid loss, ensuring optimal mineral replenishment and enhancing endurance while preventing tired muscles and sports injuries.

While athletes commonly associate magnesium with preventing muscle cramps, it also supports normal muscle function, reduces stress, and mitigates fatigue by aiding energy metabolism, thus enhancing performance during training and competition. Hydration and sports are intrinsically linked. A well-hydrated body can effectively regulate temperature, eliminate waste products, and sustain energy levels during physical activity. Compared to other water-soluble magnesium products, magnesium chloride is the highest soluble and a good solubility naturally facilitates effective absorption into your system.

Solubility of Magnesium compounds

Discover the potential with Pure Health & Earth's minerals, available in various forms to cater to diverse applications. We provide comprehensive application support to help you maximize the benefits of incorporating magnesium chloride into your products.

MgCl₂ food crystals (99% pure) is a pure magnesium chloride hexahydrate (MgCl₂.6H₂O) and is available in 25 kg bags and 1000 kg big bags.
