NATURAL PRODUCT PVT. LTD.

The Real Touch Of
Nature

Who We Are?

ACM Natural Products Private Limited is a pioneer in global spice extraction, whose roots can be traced back to 1982 Kerala. We offer a wide assortment of bio- ingredients including pungent principles of spices such as curcumin, gingerol, piperine, and their respective oleoresins and essential oils.

By the experience and expertise we specialize in complete natural food ingredient solutions from sustainable sourcing of raw materials, clean extracts, advanced research, and formulation. We have multi- locational factories in India.

The formula for the company's success lies in its sense of unyielding commitment to excellence. We firmly believe in forging close ties with our customers understanding their business and partnering their growth.

Turmeric Extract Powder”

Product Portfolio

What We Offer

By coupling together responsible sourcing of raw materials along with the most sophisticated and innovative technologies, we at ACM produce natural and sustainable products of highest value desired by people around the globe.

 **Fast Track Entry to**
All Your Required Ingredients

Oleoresins

Oleoresin represents the complete flavour and non-volatile resinous fraction present in the spices. It releases the flavour more rapidly as the exact flavour profile of the spice.

Ginger

Turmeric

Pepper

Cardamom

Capsicum

Paprika

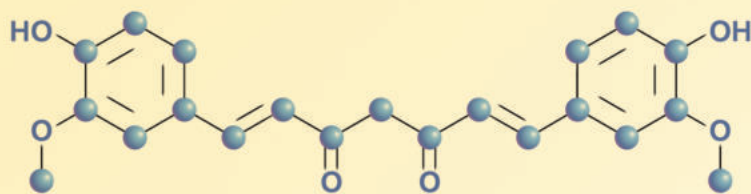

Essential Oils

Essential oils are concentrated plant extracts that retain the natural smell and flavor, or “essence,” of their source. It is widely used in aromatherapy, medicines and as well as for food and beverage industries.

Curcumin 95%

Curcumin, with its infinite benefits such as therapeutic, functional foods and dietary supplements have the stardom of anti-oxidant, anti-inflammatory, anti-septic & anti-cancerous properties. Our team is consistently exploring more exciting and innovative ways to bring something to market that reverberate with consumers.

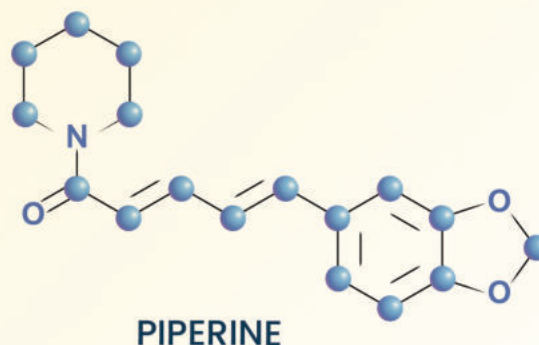

95%CURCUMIN

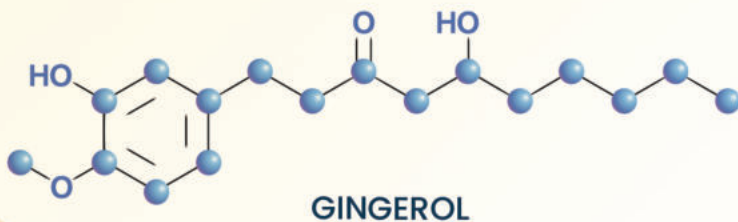

Piperine

Piperine is the major bio-active component of pepper, which imparts pungency and biting taste to it. This naturally occurring alkaloid has numerous demonstrated health effects and beneficial therapeutic properties.

Gingerol

The pungency of ginger is due to gingerol, an oily liquid consisting of homologous phenols. These compounds have antioxidant and anti-inflammatory activities. Gingerols are believed to be the more pharmacologically active constituents of ginger.

Applications

Confectionaries

Food Flavoring

Dairy Products

Fragrance

Beverages

Ready To Cook/Eat

Pharmaceutical

Nutraceutical

Ayurvedic Products

Aromatherapy

Seasonings

Cosmetics

Sourcing

We execute strategic sourcing and improve the firm's competitive position through gaining access to best-in-class capabilities across the value chain to ensure long-term competitive advantage. The company representatives are stationed at various sources of raw materials on a seasonal basis, ensuring continuous and timely supply of raw materials.

Our Facility

Our units have a total up area with an annual capacity of 23000 MT and also in - house raw material and finished goods storage facility.

We have developed in-house methods of techniques which significantly reduce human exposure during the process leading to stringent control on cross contamination and ensuring timely delivering to the company.

Effective processing & blending with the help of adequate technology combined with human resource leads to maximum utilization of raw materials for a quality effective product.

To maintain the optimum quality of the products, it has to be packed in adequate facilities meeting the requirements. The global quality specifications and norms are stored and kept in an appropriate environment

Manufacturing Facility

Quality Assurance

ACM Quality Management System is the platform that we used to guarantee food safety, compliance with quality standards and to create value for consumers. Our Quality Management System is audited and verified by independent certification bodies to prove conformity to internal standards, ISO norms, laws and regulatory requirements.

- ④ Build trust by offering products and services that match consumer expectation and preference
- ④ Comply with all internal and external food safety, regulatory and quality requirements
- ④ Gain a zero-defect, no-waste attitude by everyone in our company
- ④ Make quality and safety a group-wide objective

Refined analytical facilities that we have:

- ④ HPLC ④ GC ④ GC-MS
- ④ UV/Spectrometer ④ Polarimeter
