

Research Backed Allulose

With roots back to 2012, **allSWEET**® was the first commercially available allulose in the global marketplace. Still the market leader, non-GMO Project Verified **allSWEET**® is the go-to clean label allulose option for manufacturers and brands throughout the world. Backed by the world's largest available manufacturing capacity in the allulose space, **allSWEET**® brings more flexibility and supply chain support to the table than any other source. **allSWEET**® is available as conventional or organic certified, syrup or powder in addition to an agglomerated option for optimized flow and a brown sugar with a hint of molasses. Ideal for any sugar reduction project, non-GMO **allSWEET**® provides a clean, satisfying sweetness to any beverage, bakery, frozen dessert, confectionary or dairy application.

Allulose Syrup

PRODUCT CODE	PRODUCT NAME
