

COLLAGEN

INJA
Wellness

Think Collagen, Think INJA.

ABOUT US

We, at INJA Wellness, use only the finest quality of Collagen from Japan & India; and also provide the first truly Vegetarian Collagen. We supply the highest quality of COLLAGEN POWDER.

INJA Marine Collagen is an all-natural Hydrolyzed Collagen Peptide extracted from freshwater fish scales and skin. Our Collagen is sourced from a sustainable supply chain. INJA Fish Collagen is virtually tasteless and odorless, allowing it to be easily added to foods, beverages, nutraceutical applications & more.

VegCol is the first Vegetarian Collagen which is not a Collagen builder or booster but real Collagen. It emulates the amino acid profile of animal-derived Collagen, and is also FDA & FSSAI approved & backed by clinical studies.

WHY MARINE COLLAGEN?

Using fish as a superior alternative to bovine, porcine and chicken-sourced Collagen, INJA Collagen is characterized by its low molecular weight, leading to greater absorption in the body.

Fish Collagen is the most bio-available Collagen. It is 1.5 times better and more efficiently absorbed by the human body than other sources. It is also the safest source of Collagen and there is no chance of contracting animal diseases such as BSE & TSE.

INJA Collagen is the result of a complex and controlled hydrolysis process to obtain premium Hydrolyzed Collagen Peptides that are extremely soluble.

WHY VEG COLLAGEN?

Traditionally, Collagen was exclusively derived from animals.

Recognizing the significance of Collagen and the rise in Veganism & Vegetarianism, we have introduced the 1st Veg Collagen Peptide.

It is not a Collagen Builder or Booster, but Real Veg Collagen Peptide, which is also FDA & FSSAI approved, Vegan Certified and Clinically Proven.

Demonstrating the outcomes comparable to those of animal-derived Collagen, Veg Collagen emulates the amino-acid profile of animal-derived Collagen. It also has a richer amino-acid profile than Bovine Collagen.

WHY CHOOSE INJA?

Finest Quality

Quality is something we are not willing to compromise on. We provide only the finest quality of Collagen.

Easily Soluble

Unlike other Collagen powders, INJA Collagen dissolves easily in liquids, without having to vigorously shake it.

No Fishiness

INJA Collagen has no fishy smell or taste, making it extremely easy to use and thus, versatile.

Low Dalton Size

Due to its low Dalton size, INJA Collagen is highly effective and ensures optimum results.

Competitive Price

Despite being of the highest quality, INJA Collagen is very affordable; so, everyone can avail of its benefits.

Great Service

Quality is at the core of INJA, not just in our products, but also in our service and customer satisfaction.
