**Digestive Health
Ingredient from
Farmvale Psyllium**

We are a globally trusted & renowned name for two decades

Farmvale Psyllium is a globally trusted and renowned name in Psyllium Industry and has been a major supplier for almost two decades. With such vast experience, we have been catering to various Nutraceuticals, Pharmaceutical, Food Ingredients and Dietary Supplement Industries. **Farmvale Psyllium** is well known for its food safety accreditations due to our adoption of a six-tier approach to Total Quality Management (TQM). This adaptation has resulted in benefiting our buyers due to our strict quality control, staff training and hygiene standard processes in place – offering them complete peace of mind that the products we supply are of the highest possible standards.

Organic farming has revitalized the Indian farming industry. Today, we are the proud global producer and exporter of organic and conventional Psyllium Seeds, Psyllium Husk and Psyllium Powder all across the globe. We constantly educate and improve ourselves to be up to date with the latest manufacturing and operating processes to create competitive niche.

Our in-house R & D facility regularly conduct market research, analyse market trends and implement changes based on our findings.

Mission: World class quality

To provide support in health, well-being, healing of both people & clients while promoting sustainable ways of cultivation for a better tomorrow.

Understanding the needs of the client and to provide the best quality produce at the most competitive offers in the market while going beyond in terms of service.

To contribute to society while reaching new heights in the business.

To prove our excellence, we have our certificate

At **Farmvale Psyllium**, we believe in holding the highest food safety certificates namely **BRC, GMP, KOSHER and HALAL**. In terms of organic certification, we are proud holders of **NPOP, NOP, USDA & COR organic certificates**.

Our Facility

Farmvale Psyllium is among the leading manufacturers of Psyllium Husk and Powder in India and it has the most modern and huge manufacturing facility. Powered by our proficient R & D Team, we have a state of the art manufacturing facility spread over **60000 sq. ft.** Our manufacturing plant is located at Unjha (Gujarat). The heart of India's psyllium market, this enables us to get the fresh produce at the best price. Right from seed cleaning, processing, and packaging, all stages of production are conducted with **NO human intervention.**

The human resource at **Farmvale Psyllium** is highly qualified and regularly trained to meet the highest standards of their customer's manufacturing and quality requirements globally. To bring quality outcomes with cost effectiveness, we have designed fully automatic ultra-modern processing plant architecture by experts of agricultural processing and pharmaceutical products.

With the combination of state-of-the-art manufacturing facilities, highly qualified & trained people, **Farmvale Psyllium** ensures the production of high-quality Psyllium products conforming to the specifications and strict international standards in hygiene, quality and product safety.

Container Loading

Big Bags Loading

Packaging is of prime importance in the case of food products. Our aim is to give the end-user a fresh product. We take utmost care to ensure that our products remain free from contamination and leakage.

To begin with, we use high quality raw materials. For seeds, spices and other related products we use food grade quality, multi-wall polypropylene (PP) bags as well as 3 Ply Virgin Paper bags. The produce is stored in warehouses.

Here, hygiene is given priority. We maintain a controlled atmosphere in the warehouse, free from moisture and dust.

The finished goods are further put to test in our in house quality control laboratory. All the handling, filling, packing and weighing is done by automatic packing machines in order to avoid any cross contamination.
