

100% NATURAL, MARINE COLLAGEN FOR PETS

SEAGARDEN IS YOUR GATEWAY TO PREMIUM COLLAGEN & MARINE-INGREDIENTS, PASSIONATELY SOURCED AND SUSTAINABLY HARVESTED TO BRING THE FRESHNESS OF THE OCEAN DIRECTLY TO YOU

Marine collagen and powders from Seagarden

From nature to nurture

Seagarden collagen is produced through an enzymatic hydrolysis process where long-chained collagen is cut into short peptides for bioavailable protein that is easily digestible.

High Bioavailability

Marine collagen is known for its high bioavailability. The small particle size of fish collagen peptides allows them to be highly absorbed by animals. This means that the animal body can utilize marine collagen highly effectively, enhancing its benefits for joint, bone, gut and skin health.

Sustainability

Marine collagen supports sustainable practices. We use parts of fish that are by-products of the seafood industry, thus minimizing waste.

EFFECTS SHOWN BY RESEARCH

IMPROVED JOINT, BONE, SKIN AND GUT HEALTH

- Several studies have demonstrated that marine hydrolysed collagen has beneficial effects on joint, skin and gut health. According to Lapi et al., 2021, supplementing with Seagarden marine collagen positively impacts the gut's microbial environment, promoting the colonization of beneficial bacteria. Additionally, Daskalaki et al., 2023 revealed that Seagarden marine collagen enhances the healing process of skin wounds. Their study showed that marine collagen supplementation accelerates wound healing, as evidenced by both macroscopic evaluation of wound closure and histological analysis. Furthermore, review articles by Garcia-Cornado et al., 2018 and Geahchan et al., 2022 highlight the positive effects of collagen on bone and joint health.

Approvals and quality certificates

- FSSC-certified manufacturer of natural marine ingredients
- MSC certified raw materials - sustainable fishing
- ASC certified - farmed fish
- Kosher certified
- Halal certified

Embracing Sustainability: Choosing marine collagen means choosing a greener option. Collagen extracted from marine sources has a lower environmental footprint compared to terrestrial sources, as it avoids the need for arable land, fresh water, and feed crops – significant environmental factors associated with raising livestock.

Ethical and Inclusive: Marine collagen offers a solution that sidesteps many issues associated with terrestrial animal collagen. By avoiding risks such as disease transmission and ethical concerns related to livestock management, it presents a more conscientious choice.

Universal Acceptance: With marine collagen, there are no religious or cultural restrictions to worry about. Unlike collagen derived from porcine and bovine, which may pose consumption barriers for certain groups, marine collagen is universally acceptable.

UNIQUE FEATURES:

- 100% pure natural marine collagen
- Natural, raw materials
- Natural, mild taste and smell
- Easily soluble
- Above 90% protein content
- Low heavy metal content
- MSC certified raw materials
- Halal and Kosher certified
- Each batch is third-party tested

What does it mean to be MSC certified?

MSC certification means your seafood comes from sustainable, well-managed fisheries, preserving marine life and supporting fishing communities worldwide. Visit www.msc.org for more information.

Private Label

Discover your perfect collagen supplement with us!

With several recipes, all customizable to your brand, Seagarden provides you with the necessary flexibility to meet your needs. We create a product composed of the highest quality Nordic Collagen according to your wishes. With our wide range of collagen, it is easy to start your own brand with us.

- Personal Project Manager
- High production capacity
- Customizable formulation
- Your company brand or white-label service
- Global shipping

The process

- **Tailored customization:** Adjust your product to meet your exact specifications.
- **Personalized touches:** Taste, color, shape - your vision, your product.
- **Custom packaging:** Elevate your product's presence with our bespoke foil, boxes, and displays.
- **Brand expression:** Make your mark - imprint your brand logo and message for a uniquely resonant product.
